This bibliography for family life and sex education is divided into four sections. The first section, "Teachers' Resources," includes a listing of curriculum guides and bulletins issued by state and local agencies; other listings are related to subject areas, including (a) guidance services, (b) health, physical education, and recreation, and (c) science. The second section, "Textbooks," lists elementary and secondary school textbooks in five areas: (a) health and physical education, (b) home economics, (c) science, (d) social studies, and (e) special purpose materials. The "Special Purpose Materials" section includes publications developed for use with slow learners. The section on "Children's Literature" lists two books favorably reviewed by experts in the field. TEXTBOOKS

Some of the elementary and secondary school textbooks included in this section treat family life, health and hygiene, or biological science in a very broad and general fashion; teachers supplement these books in accordance with local practice when more specific education is wanted. Other books contain chapters with some direct discussion about the roles and responsibilities of sex partnership in marriage, family planning, and the care of young children.

A third type includes books prepared as auxiliary and sometimes detailed treatments of these topics; they are issued independently, unrelated to a specific basic textbook.

These varied publications are listed below in five areas: "Health and Physical Education," "Home Economics," "Science," "Social Studies," and "Special Purpose Materials." The last section lists publications developed for use with slow learners.

CHILDREN'S LITERATURE

The two books of this genre which have been favorably reviewed by experts in the field are particularly interesting for two reasons: The first is related to the fact that one of these books has been in use by parents and teachers in successive editions since 1928. The second point of interest is that these two books complement each other so far as age levels are concerned.

- de Schweinitz, Karl. Growing Up: How We Become Alive, Are Born, and Grow. 4th ed. New York: Macmillan, 1965. 54 p.

New photographs and diagrams accompany the revision of a book which first appeared 37 years ago. The author indicates the book is intended for "boys and girls who have begun to go to school, both those who can enjoy reading to themselves and those who like to be read to." The publisher suggests a child of 8 can read it alone. This edition of the book was favorably reviewed in The Horn Book (February 1966) and the ALA Booklist and Subscription Books Bulletin (December 1, 1965).

- Johnson, Eric W. Love and Sex in Plain Language. Illustrations by Edward C. Smith. Philadelphia: Lippincott, 1965. 68 p.

The author (who is vice-principal of Germantown Friends School) addresses

his book to "boys and girls and their parents." His preface notes that "the prose is easy enough for a bright 10-year-old . . . the information and ideas presented may be useful even to college students." He advises parents and teachers to read the book before presenting it to young people. Text and diagrams are direct and specific. There is a Foreword by Joseph Stoker, Jr., M.D., Emeritus Professor of Pediatrics, School of Medicine, University of Pennsylvania. The book was favorably reviewed in the Bulletin of the Center for Children's Books (March, 1966) and School Library Journal (June 15, 1965).

REQUESTS FOR REPORTS

Reports prepared in the Educational Materials Center are sent without charge to schools, libraries, and materials centers upon request. Bibliographic issues announce and describe recent materials received, and inform educators in the United States and abroad as to the availability and relation of such materials to the curriculum.

A school or library wishing to be placed on the mailing list to receive

future publications as they appear should write to the Educational Materials Center, U.S. Office of Education, Washington, D.C. 20202. ZIP code is required for all Office of Education mailing lists.

Other requests such as those (a) from individual teachers and librarians wishing single copies of these reports, and (b) from groups requiring copies of a specific report in quantity should be addressed to the Publications Distribution Unit, U.S. Office of Education, Washington, D.C. 20202. Be sure to give the OE number as well as the title.

Some titles of reports which are currently available are listed below.

- "Classing Curriculum Guides and Related Publications," OE-14031-22, December 31, 1962
- "Western Europe," OE-14031-23, March 15, 1963
- "Eastern Europe," OE-14031-25, June 26, 1963

FAMILY LIFE AND SEX EDUCATION

This is the first bibliography on this topic to be prepared by the staff of the Educational Materials Center. Only those books which have been sent by their publishers to the Educational Materials Center during 1963-66 have been included in this bibliography. They are listed below under "Teachers' Resources," "Textbooks," and "Children's Literature." Annotations are provided only when a book's title, in combination with the subject heading, is not self-explanatory.

The staff of this Center does not evaluate the publications received here. The functions of the Center include (a) the organization and maintenance of related materials in a research collection and (b) the dissemination of information about the nature and availability of these materials, including the results of evaluation by nongovernmental reviewing media, when such evaluation is systematically published, as in a professional journal.

Elementary and secondary school textbooks and resources used in teacher education are not frequently reviewed in the public press; therefore, all such textbooks received in the past 3 years are included here, with no reference to any published evaluations. However, children's books are reviewed in four major journals specifically designed for and widely used by school and public librarians: The American Library Association Booklist and Subscription Books Bulletin (The ALA, Chicago), The Bulletin of the Center for Children's Books (The University of Chicago Press), The Horn Book Magazine (Horn Book Inc., Boston), and The School Library Journal (R. R. Bowker Co., New York). Therefore, only a book which has been received in the Center and which has been favorably reviewed in one of these journals is listed in the "Children's Literature" section of the bibliographies compiled in the Educational Materials Center.

Inclusion of a book in this bibliography does not indicate endorsement; selection of books to support school programs remains the responsibility of State and local education agencies.

While copies of all materials listed here are available for examination at the Center in the Reporters Building, 300 Seventh Street, SW., Washington, D.C., the Center does not serve as a distribution agency for any but its own publications. The books and documents described in this and all other bibliographies issued from the Center must be obtained by the reader through the usual commercial channels or from the publishers. For information about obtaining other reports of the Center, see the final page of this bibliography.
